Acronyms

Acronym	Term	Description / Context
AE	Accredited Entity	Institution accredited by the Green Climate Fund (GCF) to develop and submit funding proposals.
CN	Concept Note	Preliminary project proposal submitted to the GCF for initial feedback and guidance.
EE	Executing Entity	Organization responsible for implementing the project or programme fully or partially.
FP	Funding Proposal	Full proposal developed on GCF template and submitted to the GCF for approval and funding.
GCF	Green Climate Fund	One of the financing mechanisms of the UNFCCC to support developing countries in responding to climate change.
LOS	Letter of Support	Document issued by the NDA confirming that a Concept Note to be submitted to GCF aligns with national priorities.
M&E	Monitoring and Evaluation	Framework to track project implementation, performance, and impact.
NDA	National Designated Authority	Government entity serving as the main interface between a country and the GCF. In Eritrea, the NDA is the Ministry of Land, Water, and Environment (MoLWE).
NDA Secretariat	Secretariat of the National Designated Authority	Dedicated team at the MoLWE (or any successor entity that assumes the NDA responsibility) to implement NDA functions as well as to facilitate Eritrea's engagement with other climate funds
NDC	Nationally Determined Contribution	Country's climate action plan under the Paris Agreement outlining emission reduction and adaptation goals.
NOL	No-Objection Letter	Mandatory letter, required by GCF, issued by the NDA on GCF's template, confirming no objection to a Funding Proposal's submission to the GCF.
NOP	No-Objection Procedure	Process through which the NDA reviews and endorses GCF FP or PPF Proposal.
PPF	Project Preparation Facility	GCF's funding mechanism provides technical and financial support for FP development.

Acronym	Term	Description / Context
SDG	Sustainable Development Goals	Global goals adopted by the UN to achieve sustainable development by 2030.
UNFCCC	United Nations Framework Convention on Climate Change	International treaty that underpins global climate change action.

Eritrea No Objection Procedure

A. Background

1. The Green Climate Fund (**GCF** or the **Fund**) has established a *no objection* system¹ to ensure that the activities funded by GCF are consistent with national climate strategies and plans and to ensure country-driven approaches. This no objection system is part of the Fund's efforts to ensure *country ownership* of all GCF-supported initiatives. The GCF no objection system delegates that *"each country will decide on its own nationally appropriate process for ascertaining no-objection to funding proposals according to the country's capacities and existing processes and institutions,"*² and requires a no-objection letter (**NOL**) issued by the country's NDA to accompany each funding proposal (**FP**).
2. A country's NDA is the main interlocutor between the country and GCF. The GCF governing instrument indicates that *"Recipient countries may designate a national authority. This national designated authority will recommend to the Board funding proposals in the context of national climate strategies and plans, including through consultation processes. The national designated authorities will be consulted on other funding proposals for consideration prior to submission to the Fund, to ensure consistency with national climate strategies and plans."*³ Therefore, each country must establish a fit-for-purpose⁴ *no objection procedure* and have an NDA for accessing funding from GCF.
3. The issuance of a NOL is a mandatory step for the submission of any FP to the GCF. The NOL signifies that the Government of Eritrea, through its NDA, has reviewed and endorsed the proposal as consistent with the country's strategic frameworks and priorities. The letter is signed by the official NDA representative registered with the GCF Secretariat following internal review and clearance by relevant authorities. In line with GCF policy, any FP submitted to the GCF without a NOL will not be processed for Board consideration. A no-objection procedure therefore serves as a vital mechanism to uphold Eritrea's ownership of GCF-financed activities and to ensure the effectiveness, transparency, accountability, complementarity and coherence of all climate finance engagements in the country.
4. Accordingly, this no-objection procedure is developed for Eritrea (**NOP** or the **Procedure**). The NOP is a 'living' process. It will be revised based on evolving needs and experience gained during the implementation, including any relevant GCF policy changes and requirements.

B. Purpose and Scope of the No Objection Procedure

5. The purpose of Eritrea **NOP** in Eritrea is to ensure that all GCF CNs and FPs are consistent with the country's national development agenda, climate strategies, and sectoral priorities, and ensure complementarity and coherence among the activities of various climate funds in similar sectors and themes within Eritrea. The NOP provides a structured and transparent process for stakeholder consultation and review, ensuring that government institutions, civil society organizations, academia, and development partners are engaged in assessing the relevance and potential impact of each proposed project interventions. By doing so, the Procedure facilitates effective coordination and coherence across national climate actions and financing initiatives.

¹ For the sake of clarity, GCF's no-objection mechanism is established by GCF's own "No-Objection Procedure" approved in GCF Board Decision B.08/10, as further updated by Decision B.42/02. In this document, the term "NOP" or "No-objection Procedure" refers to Eritrea's no-objection procedure developed to meet GCF's requirements.

² Paragraph 4 of GCF no-objection procedure, B.08/10, updated by Decision B.41/02

³ [GCF's Governing Instrument](#), paragraph 46.

⁴ This means that each country is responsible for designing its own No-Objection Procedure in a manner consistent with its legal, administrative, and institutional context.

6. **Scope.** This NOP covers the procedure for:
- i. Reviewing and endorsing project CN and issuing a Letter of Support (LOS) for CNs to be submitted to GCF. Although the GCF considers the CN a voluntary step, i.e. an AE can directly submit a FP without first submitting a CN, this Eritrean NOP strongly encourages project proponents to submit their CNs for both GCF and NDA review. Any CN submitted requires a Letter of Support (LOS) from the NDA. This allows the NDA and key stakeholders to provide early feedback and ensure that proposals are aligned with national priorities before advancing to the FP stage.
 - ii. Reviewing and endorsing FPs and issuing a NOL for FPs to be submitted to GCF, and
 - iii. Reviewing and endorsing PPF CN and issuing a NOL for PPF applications to GCF.
7. This Procedure does not cover issuance of letter of confirmation for readiness and preparatory support program grant proposals to GCF or other letter of confirmation requested by GCF on a case-by-case basis.

C. Roles and Responsibilities of the NDA

8. The NDA is the main implementer of this NOP and has the following main roles and responsibilities under the NOP:
- i. Acting as the official interface between the Government of Eritrea and the GCF, ensuring that CNs, FPs and PPF requests are consistent with national priorities, strategies and plans of Eritrea.
 - ii. Verify alignment of proposed project/program with Eritrea's climate change policies and priorities, strategies, and social objectives. GCF guidelines expect NDAs to verify that the activities included in funding proposals are aligned with national climate-related and social (e.g. gender) policies and priorities through the no-objection procedure⁵.
 - iii. No-objection communication/coordination between NDA and GCF, through the NDA representative registered at GCF. This includes issuance of a signed LOS for Concept Notes or NOL for Funding Proposals or PPF applications to the GCF Secretariat confirming that the CN, FP or PPF application, as applicable submitted to GCF conforms with the national priorities, strategies and plans of Eritrea, and that Eritrea's national process for ascertaining no-objection has been duly followed.

D. Roles and Responsibilities of the NDA Secretariat

9. The NDA Secretariat, as the implementation arm of the NDA, will provide necessary technical support for the implementation of this NOP. This includes:
- i. Provide technical advice and support on the NOP to relevant stakeholders, including AEs.
 - ii. Make available the relevant tools, including updated LOS and NOL templates and procedures, to AEs and project proponents.
 - iii. Provide other support as set out in the TOR of the NDA Secretariat.

E. Communication of No Objection to GCF

10. Eritrea's NDA, housed within the Ministry of Land, Water, and Environment (MoLWE) is responsible for managing all formal communications related to the Eritrea NOP.

⁵ As outlined in GCF Decision B.08/10 and B.41/02

11. Upon receipt of a CN or a FP or a PPF application from an AE or project proponents, the NDA Secretariat will (i) submit the Concept Note or Funding Proposal or the PPF application for national endorsement to the National Climate Change Steering Committee, and (ii) subsequently, conduct its no-objection assessment in line with established review criteria and coordination mechanisms, as outlined in sections F, G, and H below. The outcome of this assessment will be formally communicated to the relevant AE.

12. Following the procedures outlined sections F, G, and H of this document, if the proposal is endorsed by the NDA Focal Point, the NDA Secretariat will:

- i. Prepare a LOS for CN, or an NOL for FP or the PPF application, as applicable;
- ii. Submit the LOS or NOL for signature by the Minister of Land, Water and Environment or the GCF/UNFCCC focal point, serving as the NDA representative registered with the GCF, and
- iii. Transmit the LOS or NOL to the AE.

13. By communicating a No-Objection Letter, the NDA confirms that:

- i. The Government of Eritrea has no objections to the proposed project or programme;
- ii. The proposal aligns with national climate and development priorities, strategies, and plans and has undergone appropriate stakeholder consultations; and
- iii. The proposal complies with all relevant national laws, regulations, and environmental and social safeguards.

F. Standard Operation Procedure for Concept Note Review and Letter of Support Issuance

14. The process for reviewing CNs and issuing a LOS in Eritrea is designed to ensure that all project concepts submitted to the GCF are of high quality, country-driven, and consistent with national climate and development priorities and strategies.

15. The CN review and LOS issuance cycle consist of the following 5 steps:

Step 1. Submission of Concept Note to NDA

- (a) AEs or project proponents⁶ submit to the NDA Secretariat a CN for appraisal and issuance of a LOS. The submission should be made via official email of the NDA Secretariat.
- (b) The submission email to (*placeholder for Eritrea NDA email address*) must include:
 - A subject line titled “Submission of GCF Concept Note and Request for LoS.”
 - Identification of the AE and/or project proponent (if different), along with relevant partners.

Step 2. Acknowledgement and Completeness Check

- (a) Upon receipt, the NDA Secretariat acknowledges the submission and conducts a completeness check, using Annex 3, within one week to ensure all sections of the GCF Concept Note template are filled in accurately and clearly.
- (b) If the CN is incomplete, it will be returned to the AE or project proponent for clarification, additional information, or for re-submission starting from Step 1. Only complete submissions proceed to the appraisal stage.

Step 3. Appraisal and Review

- (a) Once the CN is deemed complete, the NDA Secretariat coordinates a structured simultaneous appraisal process, lasting a maximum of four weeks. The appraisal includes:
 - (i) Technical and Country Priorities Review:
 - The National Climate Change Steering Committee, comprising representatives from the line ministries and authorities as defined in the institutional framework, which will appoint a technical working team within one week.
 - The technical working team, formed specifically for each CN, will review the technical soundness of the proposal.
- (b) All reviewers will use the NDA’s standardized LOS Form for Concept Notes as per Annex 4, which aligns with GCF investment criteria (impact potential, paradigm shift potential, sustainable development, needs of the recipient, country ownership, and efficiency/effectiveness). The LOS Form ensures that the NDA is measuring how the CN performs against Eritrea’s national priorities and strategies⁷.

Step 4. Compilation and Decision

- (a) After all appraisals are received, the National Climate Change Steering Committee compiles the recommendations into a summary report for submission to the NDA Focal Point for decision. The NDA Focal Point then reviews and decides within one week whether to endorse or reject the CN.
- (b) If endorsed, the NDA issues a LoS to the AE or project proponent on the LoS Form set out in Annex 1, confirming that the project concept aligns with national priorities and the NDA supports the concept to be developed to full proposal development. The LoS will note that any subsequent amendments to the Concept Note must be communicated by the AE or the project proponent to the NDA Secretariat in writing.
- (c) If not endorsed, the NDA Secretariat will inform the AE/project proponent and provide a clear explanation, including anonymized feedback from reviewers where relevant.

⁶ The NDA encourages all project proponents to work directly with Accredited Entities for the development and submission of proposals, and strongly discourages any submissions originating from non-AEs.

⁷ Including Eritrea’s GCF Country Programme, once finalised.

Step 5. Submission to GCF

- (a) Once the CN receives the LoS, the AE submits it to the GCF Secretariat for consideration.
- (b) The review of CN by GCF will be carried out in accordance with GCF's policies and procedure. If the CN is endorsed by GCF to develop a full FP, the procedure set out in Section H below will apply for NDA's review of FPs and issuance of NOL.

G. Standard Operation Procedure for PPF application Review and for No-Objection Letter Issuance

16. GCF requires PPF applications to include, among other documents, a CN and a NOL from the NDA.
17. Prior to submitting a PPF application to GCF, the AE must seek the NDA's review and appraisal of the PPF CN following the procedure set out in **Section F. Standard Operation Procedure for Concept Note Review and Letter of Support Issuance**, and request an NOL for the PPF application.
18. If the NDA endorses the PPF CN following the review and appraisal of the PPF CN, it will issue an NOL based on the GCF's NOL template for PPF.

H. Standard Operation Procedure for Funding Proposal Review and No-Objection Letter Issuance Procedure

19. GCF requires that all FPs submitted to GCF be accompanied by a NOL issued by the NDA. The AE in partnership with implementing partners, as appropriate prepares, the GCF Funding Proposal using the GCF Funding Proposal Template. The FP review and NOL issuance cycle consist of the following 5 steps:

NOL FP Endorsement Procedure

Step 1. Submission of Funding Proposal to the NDA

- (a) The AE submits the complete FP package to the NDA Secretariat via official email or another (placeholder for Eritrea NDA email address) or another agreed method, such as flash drive. The submission must include:
- Full Funding Proposal (using the latest GCF FP template) and its mandatory annexes set out in GCF FP template;
 - Endorsement or support letters from relevant line ministries.
- (b) The email subject line must state: “Submission of GCF Funding Proposal and Request for No-Objection Letter (NOL)”.

Step 2. Acknowledgement and Completeness Check

- (a) Upon receipt, the NDA Secretariat acknowledges the submission and conducts a completeness check within one week to ensure all sections of the GCF FP template and annexes are filled in accurately and clearly.
- (b) If the submission is incomplete, it is returned to the AE with a written request for clarification or additional information.

Step 3. Appraisal and Technical Review

- (a) Once the FP is accepted as complete, the NDA Secretariat initiates the **review and appraisal process**. Similarly, to the CN appraisal if the FP is complete, then NDA will request the technical team that reviewed the CN to reconvene in order to appraise the FP.
- (b) The appraisal uses the NDA Appraisal Template in Annex 6 and is based on the GCF investment criteria. The appraisal can take place remotely and/or one or more meetings as needed and arranged by the NDA secretariat (up to 8 weeks).
- (c) All evaluators must declare any perceived or actual conflicts of interest to the NDA and if needed may be asked to withdraw from evaluating the FP in question (for example if the evaluator will be involved in implementing the project). Evaluators may be asked to sign a non-disclosure agreement if requested by the AE/project proponent.
- (d) All evaluators will use the FP Appraisal Template (Annex 6) and submit their recommendations to the National Climate Change Steering Committee. The National Climate Change Steering Committee compiles all appraisals and recommendations, summarises outcomes and submits to the NDA with a recommendation to endorse or not endorse.
- (e) To avoid conflicts within the National Climate Change Steering Committee, the NDA process should aim for consensus-based decision-making, with a majority vote as a fallback when consensus is not reached;
- (f) The AE should provide clear justification for why a project is submitted and prioritized.

Step 4. Compilation and Decision

- (a) The NDA Focal Point reviews the National Climate Change Steering Committee recommendations and accordingly:
- (i) If the NDA agrees with the Committee and decides to endorse the FP, the NDA will issue a NOL to the AE. The NOL is issued with the understanding that all subsequent considerable amendments to the FP after the NOL has been issued must be made known to the NDA by the AE in writing.

- (ii) If the FP is not endorsed, the NDA will inform the AE/project proponent and provide a clear explanation according to the feedback and recommendations received during the appraisal process.

Step 5. Submission to GCF

(a) Under the GCF's no-objection system:⁸

- (i) The GCF Secretariat formally acknowledges the receipt of the NOL to both the NDA and the respective AE.
- (ii) If a full proposal is submitted to the GCF without an accompanying NOL, the GCF Secretariat informs the NDA that the proposal cannot be processed further until the NDA provides the NOL for the proposal.
- (iii) The NDA is required to provide its no-objection within 30 days after receiving this information from GCF. After the passage of 30 day GCF suspends the proposal and notifies the relevant AE.
- (iv) To promote transparency and accountability, GCF makes all issued NOLs and related communications publicly available through the GCF website.

Additional provisions:

The NDA may also decide to seek technical assistance to support this process in various ways should resources be available.

Periodic training will be organized by the NDA secretariat for FP evaluators on how to use this appraisal template.

This structured and transparent process ensures the integrity, accountability, and country ownership of Eritrea's engagement with the GCF, while facilitating high-quality, well-aligned climate finance proposals.

⁸ GCF No-Objection Procedure, Section II. Communication of no-objection to funding proposals

Annex 1. LOS Template

Re: Letter of Support for the concept note titled “[Insert Title]” submitted by [Insert Accredited Entity Name]

Dear Madam, Sir,

We refer to the concept note titled “[insert title]” in Eritrea submitted by [insert accredited entity name] to us on [insert date].

The undersigned is the duly authorized representative of [insert NDA or focal point name], the National Designated Authority of Eritrea.

Pursuant to GCF Decisions B.08/10, B.37/22, and B.41/02, the content of which we acknowledge to have reviewed, in my capacity as representative of the national designated authority, we hereby communicate our no-objection to the concept note.

Through this letter, we are pleased to communicate our **support** for the concept note.

By expressing our support, we confirm that:

1. The Proposal aligns with the **national priorities, strategies, and plans** of Eritrea, including those related to climate change, sustainable development, and sectoral objectives.
2. The Proposal addresses **identified national needs** and has the potential to deliver benefits for communities, ecosystems, and national systems.

This Letter of Support is issued upon the request of [insert entity name] for the purpose of accompanying the concept note during its submission to GCF.

Kind regards,

[full name]

Re: No-objection letter in respect of the Choose an item. titled “[insert title]” submitted by [insert accredited entity name]

Dear Madam, Sir,

We refer to the Choose an item. titled “[insert title]” in [insert name of country] submitted by [insert accredited entity name] to us on [insert date] (the “Choose an item.”)

The undersigned is the duly authorized representative of [insert NDA or focal point name], the national designated authority of [insert name of country].

Pursuant to GCF Decisions B.08/10, B.37/22, and B.41/02, the content of which we acknowledge to have reviewed, in my capacity as representative of the national designated authority, we hereby communicate our no-objection to the Proposal.

By communicating our no-objection, it is implied that:

- (a) The government of [insert name of country] has no-objection to the Proposal; and
- (b) The Proposal is in conformity with the national priorities, strategies and plans of [insert name of country].

We also confirm that our national process for ascertaining no-objection to the Choose an item. has been duly followed.

Notwithstanding the foregoing, we expect [insert accredited entity name] to take the necessary measures to ensure that the Choose an item. as described in the Choose an item. [is or are] implemented in a manner consistent with applicable national laws.

[We further confirm that our no-objection to the Proposal also applies to any project preparation facility application made by [insert accredited entity name] after the submission of the Proposal to the GCF Secretariat.]

We acknowledge that this letter will be made publicly available on the GCF website.

Kind regards,

[full name]

Criteria	Assessment questions	Assessment results
Project Rationale	Does the project have a satisfactory climate rationale?	☐ Yes ☐ No ☐ Need clarification Rationale and reference:
	Is there sufficient evidence to support this, e.g., survey, report, pre-feasibility study, market analysis, scaling up of proven and viable technologies?	☐ Yes ☐ No ☐ Need clarification Rationale and reference:
Project objective against the baseline	Has the objective of the project been clearly defined?	☐ Yes ☐ No ☐ Need clarification Rationale and reference:
	Is the project likely to improve the baseline scenario?	☐ Yes ☐ No ☐ Need clarification Rationale and reference:
Impact Potential	Mitigation: Does the project contribute to a shift to low-emission sustainable development pathways e.g., CO ₂ e reduced due to the project, and/or cost effectiveness, i.e., total project cost compared to CO ₂ e reduced	☐ Yes ☐ Not applicable ☐ No ☐ Need clarification Rationale and reference:
	Adaptation: Does the project contribute to increased climate-resilient sustainable development e.g., number of direct/indirect beneficiaries, and/or beneficiaries relative to total population, total area benefited.	☐ Yes ☐ Not applicable ☐ No ☐ Need clarification Rationale and reference:

Paradigm shift potential	Does the project have the potential to catalyse impact in the long term, and beyond the scope of the proposed project (potential for scaling-up and replication of the project, knowledge and learning, contribution to regulatory frameworks, policies and public planning, mobilisation of other actors, market development and transformation)?	☐ Yes ☐ No ☐ Need clarification Rationale and reference:
Sustainable development potential	Does the project have substantial context specific economic, social, environmental and gender-sensitive development impact co-benefits? (examples include improved public health, improved energy security and improved forest ecosystem health)	☐ Yes ☐ No ☐ Need clarification Rationale and reference:
Needs of the recipient	Does the project reduce the level of exposure to climate risks and the degree of vulnerability, and address the needs and vulnerability of the beneficiary population or sector? Has a vulnerability assessment been conducted?	☐ Yes ☐ No ☐ Need clarification Rationale and reference:
	Does the project describe the country's financial, economic, social and institutional needs and the barriers to accessing domestic (public), private and other international sources of climate-related finance and outline how the proposed intervention will address the identified needs and barriers?	☐ Yes ☐ No ☐ Need clarification Rationale and reference:
Country ownership	Is the proposal aligned with existing national policies, priorities, and strategies, such as the NDC, NAP, and GCF Country Programme?	☐ Yes ☐ No ☐ Need clarification Rationale and reference:
	Has the AE consulted all relevant stakeholders in the country/is there a plan to consult with all relevant stakeholders during FP development?	☐ Yes ☐ No ☐ Need clarification Rationale and reference:
Efficiency and effectiveness	Is the project economically and financially sound, taking into consideration the total funding requested, financing already or expected to be secured, any potential revenues and in-kind contributions?	☐ Yes ☐ No ☐ Need clarification Rationale and reference:

Consultation and multi-stakeholder engagement	Has the project undertaken sufficient consultation by taking into consideration and involving all relevant stakeholders (including donors, private sector, provinces, local communities, and civil society)?	☐ Yes ☐ No ☐ Need clarification Rationale and reference:
Potential overlaps / duplication, to be resolved (and suitability of location)	Is the project duplicating existing work?	☐ Yes ☐ No ☐ Need clarification Rationale and reference:
	Is it proposed that the project be implemented in an area that has already been supported by another project with same/similar activities?	☐ Yes ☐ No ☐ Need clarification Rationale and reference:
Exit Strategy	Is there an exit strategy and evidence that the project activities can be maintained after project funding?	☐ Yes ☐ No ☐ Need clarification Rationale and reference:
	Have the maintenance and cost implications for the Government been sufficiently outlined?	☐ Yes ☐ No ☐ Need clarification Rationale and reference:
