Acronyms

NDA	National Designated Authority
GCF	Green Climate Fund
GEDSI	Gender, Equity, Disability, and Social Inclusion
NDC	Nationally Determined Contribution
AF	Adaptation Fund
ESS	Environmental and Social Safeguards
GEF	Global Environment Facility

1. Executive summary

This assessment provides a comprehensive review of Eritrea's National Designated Authority (NDA) capacity to engage with the Green Climate Fund (GCF) and identifies the institutional, technical, and human resource improvements needed to strengthen its performance. The findings indicate that while the NDA demonstrates foundational capacity and commitment to advancing climate finance readiness, significant gaps remain in governance structures, technical knowledge, and operational tools needed to meet GCF expectations.

The assessment revealed that Eritrea's NDA has foundational capacity to engage with GCF, but faces gaps in institutional frameworks and lacks clearly defined roles and formalized coordination procedures. In addition, limited technical knowledge of GCF processes, insufficient staff training and knowledge retention systems, and underdeveloped project tracking tools constrain its ability to deliver on core GCF functions and fully access climate finance opportunities.

The report recommends **strengthening institutional frameworks** by finalizing roles, responsibilities and procedures, **building staff capacity** through targeted and ongoing training, and improving stakeholder engagement with structured consultations and a functional grievance mechanism. It also calls for the development of robust **knowledge management systems**, including a centralized project database, introduce standardized screening and appraisal tools, and procedures to ensure institutional memory and effective monitoring.

With targeted investments in institutional strengthening, staff development, and systems improvement, the NDA will be well-positioned to increase Eritrea's access to climate finance and implement high-quality, impactful climate projects aligned with national priorities.

2. Purpose and Objectives

This Needs Assessment Report examines the current capacity of Eritrea's National Designated Authority (NDA), housed within the Ministry of Land, Water and Environment, to effectively engage with the Green Climate Fund (GCF). The Report evaluates the current technical, human, and institutional capacity of the NDA. The purpose of this assessment is to identify strengths, gaps, and priority areas for support to enhance the NDA's ability to fulfill its mandated functions and to enable greater national access to climate finance from the GCF.

The Needs Assessment Report has the following objectives:

- 1) **Assess NDA Functions and Capacities:** Evaluate the NDA's ability to perform core GCF related functions, including coordination, strategic oversight, no-objection processes, and stakeholder engagement
- 2) **Identify Human Resource and Technical Capacity Gaps:** Examine the skills, knowledge, and expertise of NDA staff to identify training and technical assistance needs
- 3) **Review Existing Institutional Frameworks and Operating Procedures:** Analyze the institutional structure, governance mechanisms, and existing procedure of the NDA to determine adequacy, efficiency, and alignment with GCF requirements

- 4) **Recommend Priority Actions to Strengthen Capacity:** Provide actionable recommendations for strengthening the NDA's institutional, technical, and human capacity to support effective engagement with the GCF

3. Overview of the Role of the Nationally Designated Authority

The NDA serves a key function in the architecture of the GCF, as it represents the national priorities and interests of the country in interactions with the GCF. As such, the core functions of the NDA are to:

- Recommend funding proposals to the GCF Board in the context of national climate change strategies and plans and ensure that all submitted concepts and proposals are consistent with national plans and strategies;
- Facilitate the nomination of Direct Access Accredited Entities (DAEs; sub-national, national, or regional);
- Implement the no-objection procedure;
- Act as the focal point for Fund communication;
- Convene consultations with national stakeholders; and
- Lead and support the Readiness Process including, identifying readiness needs, developing and submitting readiness proposals, and assisting with the implementation of readiness activities.

To effectively complete the core functions listed above, the GCF has indicated the following required capacities of the NDA:

- Ability to ensure alignment with the Country Programme and synergies with other national priorities;
- Ability to ensure compliance with Environmental and Social Standards (ESS), fiduciary standards, and gender principles;
- Understanding of financial instruments;
- Understand the whole project cycle and ability to conduct monitoring according to GCF standards; and
- Access to climate change expertise.

4. Analysis of the Current Capacity of the Eritrea's Ministry of Land, Water and Environment

To assess the current capacity of Eritrea's NDA, ClimFin developed a questionnaire based on the core roles and capacities required for effective NDA functioning (see Annex I). The questionnaire examined four core capacity groups:

1. Institutional Capacity: Assess NDA staff capacity to effectively complete the core functions of the NDA and understand if what, if any, processes exist to support this completion of these functions;
2. Technical Capacity: Assess NDA staff knowledge of GCF, including key policies and plans, funding windows, structure and operations, and determine if there are any processes related to the NDA's relationships with the GCF.

3. **Human Capacity:** Assess NDA staff knowledge of climate change, national policies, and climate finance, and analyze the currently defined roles and responsibilities of the NDA.
4. **Technology and Digital Tools:** Assess the NDA's use of technological and digital tools to support effective engagement with the GCF.

The questionnaire also provided the opportunity for NDA staff to provide open feedback on the NDA's top three capacity gaps or challenges in performing its GCF functions and top three forms of support that would be most helpful to the NDA to build capacity. The questionnaire was sent to be completed by the NDA team on 31st July 2025 with a two-week period for submission.

The questionnaire was distributed to a representative sample that included all staff and stakeholders directly involved in Eritrea's NDA function, covering key institutional and technical roles. Five completed responses were received, representing 100% participation, making the results highly representative and ensuring that the findings accurately reflect the perspectives of the entire NDA team. This high level of coverage strengthens the validity and reliability of the assessment results and provides a sound basis for the recommendations presented.

The following sections summarize key findings from the survey across the four core capacity groups.

4.1. Institutional

Institutional capacity refers to the formal structures, governance systems, and operating procedures that enable the NDA to effectively fulfill its mandate with the GCF. It includes clarity of roles and responsibilities, coordination across ministries and agencies, stakeholder consultation mechanisms, and the establishment of transparent decision-making processes such as the no-objection procedure.

Clarity of Roles:

- Roles and responsibilities are only partially defined and documented, leaving gaps in clarity and accountability.
- NDA's ability to fulfill core functions such as recommending proposals, implementing the no-objection procedure, and facilitating nominations is rated mostly at "needs support" level.

Coordination:

- Rated as "somewhat effective" by all respondents.
- Requires clearer communication channels, formalized coordination procedures, and a unified national climate strategy.

Stakeholder Consultations:

- Irregular and informal. Mechanisms for stakeholder engagement and feedback are still under development.

Gender, Equity, Disability, and Social Inclusion (GEDSI):

- Partial integration (gender analysis done during project reviews), but no dedicated focal point or training for NDA staff.

Grievance Mechanism:

- Currently absent but acknowledged as under development.

Country Programme & No-Objection Procedure:

- A GCF country programme is in early development stages and is being developed in alignment with Eritrea's NDC.
- Draft no-objection process exists but needs formalization.

4.2. Technical

Technical capacity refers to the specialized knowledge, tools, procedures, and systems that enable an NDA to understand and apply GCF policies, investment criteria, and funding modalities, as well as to appraise proposals, track policy developments, and ensure compliance with international standards.

Knowledge of GCF Processes:

- The majority of respondents have only basic knowledge of GCF funding windows, investment framework, and strategic plan.
- There is no established process to track GCF Board decisions or maintain updated guidance.

Proposal Appraisal Tools:

- No checklist or screening tool to assess project alignment with GCF frameworks (IRMF, Investment Criteria, Strategic Plan).

Compliance:

- No dedicated personnel for ensuring compliance with GCF's ESS, fiduciary, and gender policies (still under development).

4.3. Human

Human capacity relates to the skills, expertise, and professional experience of NDA staff, including their knowledge of climate change, national and international climate policies, financial instruments, safeguards, and gender and social inclusion, which together determine the NDA's ability to perform its core functions effectively.

Climate Knowledge:

- Most staff have at least some knowledge of climate change and Eritrea's climate policies, but knowledge of international finance mechanisms and financial instruments remains limited.

Capacity Building Needs (top areas):

- GCF operations & access modalities
- Climate finance project development
- No-objection procedures
- Gender and social inclusion, safeguards

Institutional Memory:

- Knowledge retention systems are only partially established (some reports and databases, but no formal manuals or tools).

Staff Turnover:

- Reported as low, but institutional continuity could be strengthened by digitalizing procedures.

3.4 Technology

Technology and digital tools encompass the platforms, systems, and applications that support an NDA's efficiency and effectiveness, including document management, project tracking, monitoring and evaluation, stakeholder communication, and mechanisms for knowledge management and grievance redress.

Strengths:

- Use of email, virtual meetings, and GCF's digital portal for coordination.

Gaps:

- Limited tools for project tracking, monitoring, knowledge management, or grievance redressal.

5. Capacity Building Needs Recommendations

To strengthen Eritrea's capacity as the National Designated Authority (NDA) for the Green Climate Fund (GCF), a comprehensive approach is required across institutional, human, and technical dimensions.

First, institutional strengthening is critical. The NDA's structure should be finalized with clearly defined and documented roles and responsibilities for all team members. Formal procedures must be established for key functions, including the no-objection process for GCF and Adaptation Fund projects, as well as entity nomination procedures. This will ensure greater transparency, accountability, and consistency in decision-making and project endorsement.

Second, capacity building must be prioritized to equip NDA staff and relevant stakeholders with the technical knowledge and practical skills required to engage effectively with the GCF. This includes structured training programmes on GCF access modalities, project identification and preparation, fiduciary and safeguard standards, and integrating gender, equity, disability, and social inclusion (GEDSI) considerations into project design and review processes.

Third, robust stakeholder engagement mechanisms should be developed and institutionalized. Establishing a regular consultation calendar, creating an inclusive stakeholder engagement framework, and setting up a functional grievance redress mechanism will ensure meaningful participation of government agencies, technical experts, civil society organizations, and community representatives. This will promote greater country ownership and alignment with national priorities.

Fourth, knowledge management systems must be enhanced to retain institutional memory and improve decision-making. This can involve among others, developing a centralized database for climate change tracking and preparing user-friendly manuals and checklists for proposal review and screening. These tools will allow for consistency even in cases of staff turnover and will improve the NDA's ability to monitor progress and report results to the GCF.

The NDA demonstrates foundational capacity but requires significant strengthening in coordination, knowledge, and tools to fully meet GCF expectations. With targeted institutional support, training, and improved systems, the NDA could significantly enhance Eritrea's ability to access, manage, and report on climate finance effectively

Annex 1 - NDA Baseline Capacity Assessment Stakeholder Questionnaire

NDA Baseline Capacity Assessment Stakeholder Questionnaire

Introduction

ClimFin has developed the following questionnaire intended to gather baseline information on the level of technical knowledge, human capacity, and institutional arrangements of the Ministry of Land, Water and Environment to effectively operate as a National Designated Authority (NDA) to the Green Climate Fund (GCF). This questionnaire is based on the required general capacities of the NDA as outlined in GCF policies. The questionnaire will be anonymous and only aggregated data will be reported. The questionnaire should take 15 to 20 minutes to complete.

Institutional Capacity - Core functions of the NDA

- 1) The following table provides the main roles and responsibilities of the NDA, as decided by the GCF Board. How confident are you in your ability to fulfil the following functions:

Role/ Responsibility	I am an expert and fulfil this role confidently	I have some knowledge on this and would need further guidance and support	I have a little bit of knowledge on this and would need a lot of guidance and support	I have no knowledge of this
Recommend funding proposals to the GCF Board in the context of national climate change strategies and plans				
Facilitate the nomination of Direct Access Accredited Entities (sub-national, national, or regional)				
Implement the No-objection procedure for GCF funding				

proposals				
Convene consultations with national stakeholders				
Lead and support the Readiness Process including, identifying readiness needs, developing and submitting readiness proposals, and assisting with the implementation of readiness activities				
Act as the focal point for all GCF communication				

2) Are the roles and responsibilities of the NDA staff clearly defined and documented?

- Yes
- No
- Partially

If yes or partially, please briefly describe how _____

3) How effective is the NDA in coordinating with other ministries and agencies within the government?

- Very effective
- Effective
- Somewhat effective
- Not effective

What improvements are needed in your opinion? _____

4) Are there regular stakeholder consultations held on climate finance matters?

- Yes

- No
- This are held irregularly

5) What topics are generally covered during consultations?

Please briefly describe how:

6) Which stakeholders are usually included in consultations?

Please briefly describe how:

7) Is there an established stakeholder consultation process or mechanism?

- Yes
- No
- This is currently under development

8) Does the NDA have a strategy or focal point to address gender, equity, disability, and social inclusion (GEDSI) issues?

- Yes
- No
- This is currently under development

9) How are GEDSI issues integrated into NDA activities? (Please select all that apply)

- Inclusive stakeholder consultations
- Gender/social analysis during project reviews
- Disaggregated data collection
- Collaboration with GEDSI organizations
- Training of NDA staff on GEDSI

10) Does the NDA have a Grievance Mechanism procedure for stakeholders who have been negatively impacted by a climate change project?

- Yes
- No
- This is currently under development

11) Are there any drafts or high level ideas of Eritrea's country programme for the GCF?

- Yes
- No

If yes, can you share any early drafts, ideas, or information on the country programme development with ClimFin?

12) Is there a procedure or draft process for No-Objection for either GCF or the Adaptation Fund projects?

- Yes
- No

If yes, can you share the procedure or draft process with ClimFin?

13) Is there a procedure or draft procedure for entity nominations? Either for GCF or the AF

- Yes
- No

If yes, can you share the procedure with ClimFin?

14) Is there a database or system to track climate finance projects either in development or currently in implementation?

- Yes
- No

Technical Capacity - GCF Institutional knowledge

15) How familiar are you with the GCF funding windows and modalities?

- I am an expert
- I have some knowledge
- I have a little knowledge
- I have no knowledge

16) How familiar are you with the GCF Investment Framework?

- I am an expert
- I have some knowledge
- I have a little knowledge
- I have no knowledge

17) How familiar are you with the GCF's Updated Strategic Plan (2024 -2027)?

- I am an expert
- I have some knowledge
- I have a little knowledge
- I have no knowledge

18) How familiar are you with the GCF's Sustainability and Inclusion Policies, including the Environment and Social Policy, Indigenous Peoples Policy and Gender Policy?

- I am an expert
- I have some knowledge
- I have a little knowledge
- I have no knowledge

19) How familiar are you with the structure, operations, and processes of the GCF?

- I am an expert
- I have some knowledge
- I have a little knowledge
- I have no knowledge

20) Are there procedures in place to track the proceedings of and new policies adopted by the GCF Board at their meetings?

- Yes
- No
- If yes, please describe briefly _____

21) Does the NDA have a process in place to review and appraise GCF proposals?

- Yes
- No
- This is currently under development

22) Does the NDA have a checklist or screening tool to measure projects against the GCF Integrated Results Management Framework, Investment Framework, and Strategic Plan?

- Yes
- No

23) Within the NDA, is there a person or people dedicated to ensuring compliance with GCF's ESS, fiduciary, and gender standards?

- Yes
- No
- This is currently under development

Human Capacity

24) What is your level of knowledge and expertise on climate change?

- I am an expert
- I have some knowledge
- I have a little knowledge
- I have no knowledge

25) What is your knowledge of Eritrea's national climate policies, strategies and plans?

- I am an expert
- I have some knowledge
- I have a little knowledge
- I have no knowledge

26) What is your knowledge of different sources of international climate finance (e.g., Green Climate Fund, Adaptation Fund)?

- I am an expert
- I have some knowledge
- I have a little knowledge
- I have no knowledge

27) What is your knowledge level of different financial instruments for investing in climate projects (e.g. grants, loans, guarantees, equity)?

- I am an expert
- I have some knowledge
- I have a little knowledge
- I have no knowledge

If applicable, which funding mechanisms do you need more information on?

28) Are there defined roles and responsibilities for each member of the NDA team?

- Yes
- No

If yes, can ClimFin be provided with an overview of these roles and responsibilities?

29) In which areas does the NDA staff require capacity building? (please select all that apply)

- GCF operations and access modalities
- Climate finance project development
- Gender and social inclusion
- Environmental and social safeguards
- Stakeholder engagement
- Monitoring and evaluation
- No-objection procedures
- Others, please specify: _____

30) How frequently does staff turnover affect institutional continuity?

- Frequently
- Occasionally
- Rarely
- Never

31) Are there mechanisms in place to retain institutional knowledge when staff leaves (e.g. manuals, knowledge tracking systems/tools, databases)?

- Yes
- No
- Partially

If yes or partially, please briefly describe _____

Technology and Digital Tools

32) Does the NDA use digital platforms and/or tools for the following functions? (Please select all that apply)

- Document storage and file sharing
- Stakeholder communications such as through mailing lists, websites, or webinars
- Project tracking and monitoring
- Collaboration with external partner
- Others _____
- Please list any digital tools or platforms currently used _____

Open feedback

33) What are the NDA's top three capacity gaps or challenges in performing its GCF functions?

- _____
- _____
- _____

34) What are the top three forms of support that would be most helpful to the NDA to build capacity?

- _____
- _____
- _____
- _____

Annex 2 - NDA Capacity Assessment Results

ClimFin has developed the following questionnaire intended to gather baseline information on the level of technical knowledge, human capacity, and institutional arrangements of the Ministry of Land, Water and Environment to effectively operate as a National Designated Authority (NDA) to the Green Climate Fund (GCF). This questionnaire is based on the required general capacities of the NDA as outlined in GCF policies. The questionnaire will be anonymous and only aggregated data will be reported. The questionnaire should take 15 to 20 minutes to complete.

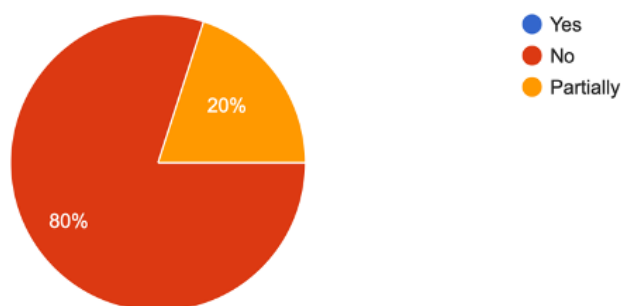

Institutional Capacity - Core functions of the NDA

1. The following table provides the main roles and responsibilities of the NDA, as decided by the GCF Board. How confident are you in your ability to fulfil the following functions:

	I am an expert and fulfil this role confidently	I have some knowledge on this and would need further guidance and support	I have a little bit of knowledge on this and would need a lot of guidance and support	I have no knowledge of this
Recommend funding proposals to the GCF Board in the context of national climate change strategies and plans	0	2	1	2
Facilitate the nomination of Direct Access Accredited Entities (sub-national, national, or regional)	0	1	1	3
Implement the No-objection procedure for GCF funding proposals	0	1	2	2
Convene consultations with national stakeholders	1	3	1	0
Lead and support the Readiness Process including, identifying readiness needs, developing and submitting readiness proposals, and assisting with the implementation of readiness activities	0	1	3	1
Act as the focal point for all GCF communication	1	0	3	1

2. Are the roles and responsibilities of the NDA staff clearly defined and documented?

Yes	0
No	4
Partially	1

If yes or partially, please briefly describe how: 1 response

- The roles and responsibilities of the NDA staff in Eritrea are partially defined and documented. There are foundational documents outlining some roles, and efforts are ongoing to build capacity, provide training, and develop coordination mechanisms. While progress has been made, some procedures and institutional structures are still being refined to fully clarify and formalize all roles and responsibilities. The framework exists but continues to evolve for better effectiveness and compliance.

3. How effective is the NDA in coordinating with other ministries and agencies within the government?

Very effective	0
Effective	0
Somewhat effective	5
Not effective	0

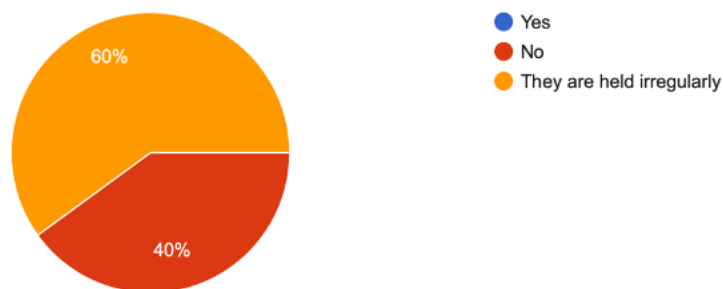

What improvements are needed in your opinion? 5 responses

- Clearly defined role and responsibility and capacity building training workshops
- The National Designated Authority (NDA) is improving coordination with government ministries but still faces challenges like limited collaboration and institutional structures. Key progress includes building capacity, creating clear roles, and engaging stakeholders. To be more effective, the NDA needs a unified national climate strategy, stronger training, formal coordination procedures, wider stakeholder involvement, and regular monitoring to ensure smooth climate governance and better resource mobilization.
- Coordination with stakeholders is important and discussion with stakeholder representatives is also necessary in addition to these stakeholders should have to represent at least one person.
- Coordination with stakeholders is important and discussions and training are also necessary.
- The NDA team has to have a clear organization as well as communication approaches.

4. Are there regular stakeholder consultations held on climate finance matters?

Yes	0
No	2
They are held irregularly	3

5. What topics are generally covered during consultations? 3 responses

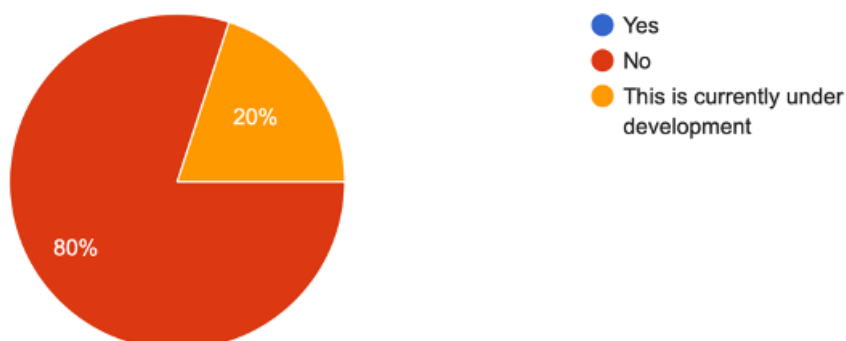

- Focusing stakeholder consultations on project identification, formulation, and characterizing bankable projects in Eritrea which strengthens the climate finance process by improving project quality and alignment with national priorities. It builds technical capacity to develop financially viable projects, fosters greater stakeholder ownership, and supports smoother access to Green Climate Fund resources.
- During consultation we discuss mainly on nationally identified priority renewable energy and energy efficiency, Agricultural related bankable projects which are socio-economic viability environmental sustainability.
- During consultation renewable energy and energy efficiency projects which have positive socio-economic and environmental matters have to be discussed in detail.

6. Which stakeholders are usually included in consultations? 1 response

- Stakeholders usually included in consultations encompass a broad range of actors to ensure comprehensive engagement and coordination. Key groups typically involved are: Government ministries and agencies related to climate change, environment, agriculture, water, finance, and other sectors linked to climate priorities. Technical experts and project developers who contribute to project identification, formulation, and ensuring proposals meet funding criteria. Local authorities and community representatives to incorporate ground-level perspectives and needs. Community based organizations such as women and Youth groups. Energy, Agriculture, transport, waste Industry Agriculture, Energy, Transport, waste, Industry sectors are included.

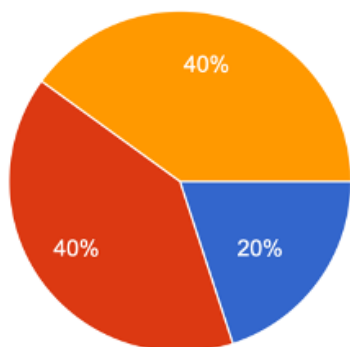

7. Is there an established stakeholder consultation process or mechanism?

Yes	0
No	4
This is currently under development	1

8. Does the NDA have a strategic social inclusion (GEDSI) issue

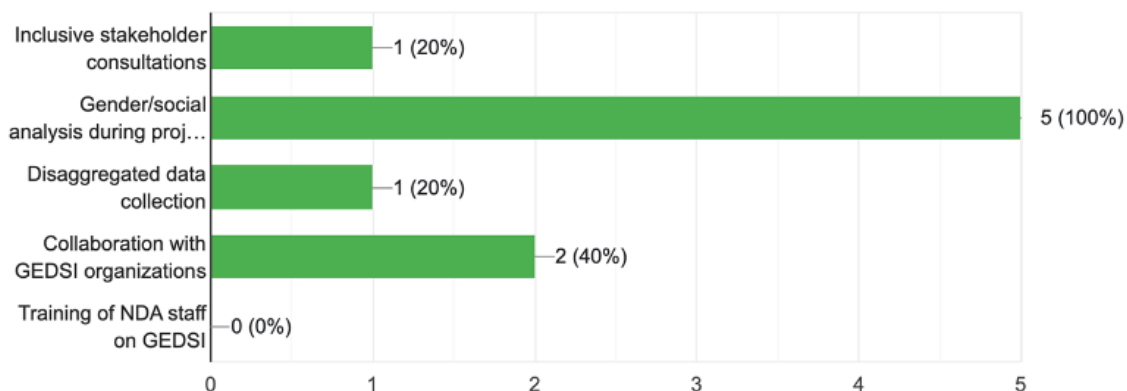

Yes	1
No	2
This is currently under development	2

● Yes
● No
● This is currently under development

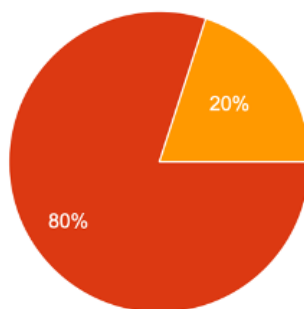

9. How are GEDSI issues integrated into NDA activities? (Please select all that apply)

Value	Count
Inclusive stakeholder consultations	1
Gender/social analysis during project reviews	5
Disaggregated data collection	1
Collaboration with GEDSI organizations	2
Training of NDA staff on GEDSI	0

10. Does the NDA have a Grievance Mechanism procedure for stakeholders who have been negatively impacted by a climate change project?

Yes	0
No	4
This is currently under development	1

● Yes
● No
● This is currently under development

11. Are there any drafts or high level ideas of Eritrea's country programme for the GCF?

Yes	2
No	3

If yes, can you share any early drafts, ideas, or information on the country programme development with ClimFin? 2 responses

- Eritrea is developing its Green Climate Fund (GCF) country programme as part of ongoing readiness efforts. The programme will be aligned with the country's Nationally Determined Contribution (NDC) and focuses on building coordination mechanisms, preparing high-quality project concepts, enhancing stakeholder engagement, and establishing monitoring frameworks. The readiness proposal emphasizing institutional strengthening, capacity building, and integration with national climate priorities is foundational which aims to improve Eritrea's access to and management of climate finance for adaptation and mitigation goals.
- Eritrea is developing climate friend renewable energy and energy efficiency projects which are included in its NDC.

12. Is there a procedure or draft process for No-Objection for either GCF or the Adaptation Fund projects?

Yes	1
No	4

If yes, can you share the procedure or draft process with ClimFin? 1 response

- Draft concept notes are reviewed and feedback is sent to the Ministry that has developed the concept notes.

13. Is there a procedure or draft procedure for entity nominations? Either for GCF or the AF.

Yes	0
No	5

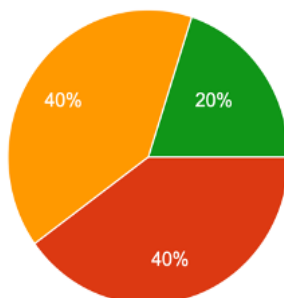

14. Is there a database or system to track climate finance projects either in development or currently under implementation?

Yes	0
No	5

Technical Capacity - GCF Institutional knowledge

15. How familiar are you with the GCF funding windows and modalities?

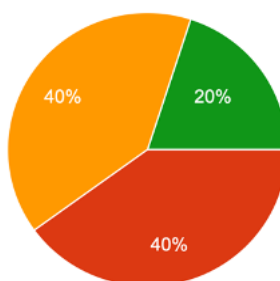

I am an expert	0
I have some knowledge	2
I have a little knowledge	2
I have no knowledge	1

- I am an expert
- I have some knowledge
- I have a little knowledge
- I have no knowledge

16. How familiar are you with the GCF Investment Framework?

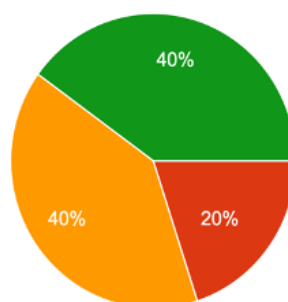

I am an expert	0
I have some knowledge	2
I have a little knowledge	2
I have no knowledge	1

- I am an expert
- I have some knowledge
- I have a little knowledge
- I have no knowledge

17. How familiar are you with the GCF's Updated Strategic Plan (2024 -2027)?

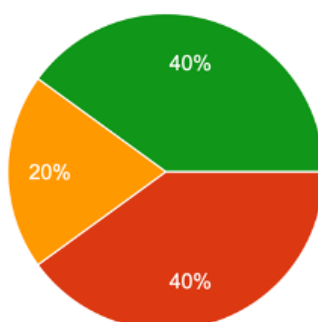

I am an expert	0
I have some knowledge	1
I have a little knowledge	2
I have no knowledge	2

- I am an expert
- I have some knowledge
- I have a little knowledge
- I have no knowledge

18. How familiar are you with the GCF's Sustainability and Inclusion Policies, including the Environment and Social Policy, Indigenous Peoples Policy and Gender Policy?

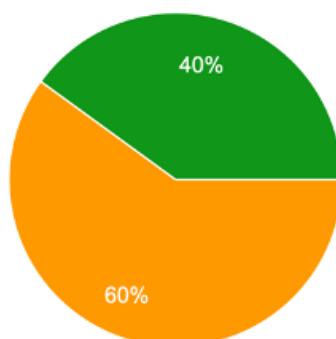

I am an expert	0
I have some knowledge	2
I have a little knowledge	1
I have no knowledge	2

- I am an expert
- I have some knowledge
- I have a little knowledge
- I have no knowledge

19. How familiar are you with the structure, operations, and processes of the GCF?

I am an expert	0
I have some knowledge	0
I have a little knowledge	3
I have no knowledge	2

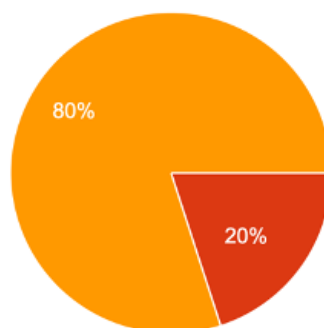

- I am an expert
- I have some knowledge
- I have a little knowledge
- I have no knowledge

20. Are there procedures in place to track the proceedings of and new policies adopted by the GCF Board at their meetings?

Yes	0
No	5

21. Does the NDA have a process in place to review and appraise GCF proposals?

Yes	0
No	1
This is currently under development	4

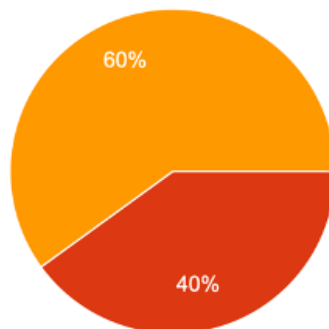

- Yes
- No
- This is currently under development

22. Does the NDA have a checklist or screening tool to measure projects against the GCF Integrated Results Management Framework, Investment Framework, and Strategic Plan?

Yes	0
No	5

23. Within the NDA, is there a person or people dedicated to ensuring compliance with GCF's ESS, fiduciary, and gender standards?

Yes	0
No	2
This is currently under development	3

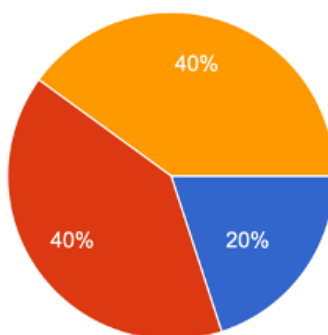

- Yes
- No
- This is currently under development

Human Capacity

24. What is your level of knowledge and expertise on climate change?

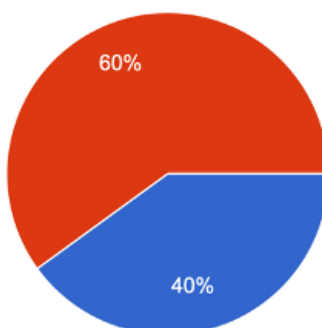

I am an expert	1
I have some knowledge	2
I have a little knowledge	2
I have no knowledge	0

- I am an expert
- I have some knowledge
- I have a little knowledge
- I have no knowledge

25. What is your level of knowledge of Eritrea's national climate policies, strategies and plans?

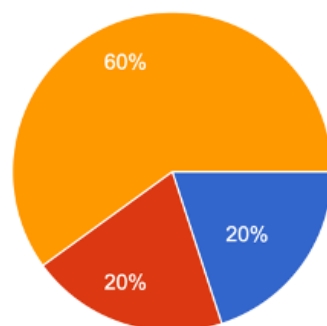

I am an expert	2
I have some knowledge	3
I have a little knowledge	0
I have no knowledge	0

- I am an expert
- I have some knowledge
- I have a little knowledge
- I have no knowledge

26. What is your knowledge of different sources of international climate finance (e.g., Green Climate Fund, Adaptation Fund)?

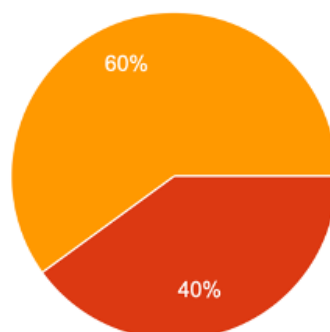

I am an expert	1
I have some knowledge	1
I have a little knowledge	3
I have no knowledge	0

- I am an expert
- I have some knowledge
- I have a little knowledge
- I have no knowledge

27. What is your knowledge level of different financial instruments for investing in climate projects (e.g. grants, loans, guarantees, equity)?

I am an expert	0
I have some knowledge	2
I have a little knowledge	3
I have no knowledge	0

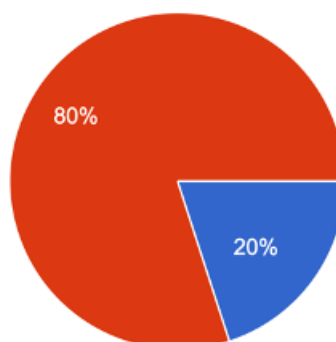

- I am an expert
- I have some knowledge
- I have a little knowledge
- I have no knowledge

If applicable, which funding mechanisms do you need more information on? 3 responses

- GCF and GEF as well as the Adaptation Fund
- GCF and GEF
- Guarantees and equity

28. Are there defined roles and responsibilities for each member of the NDA team?

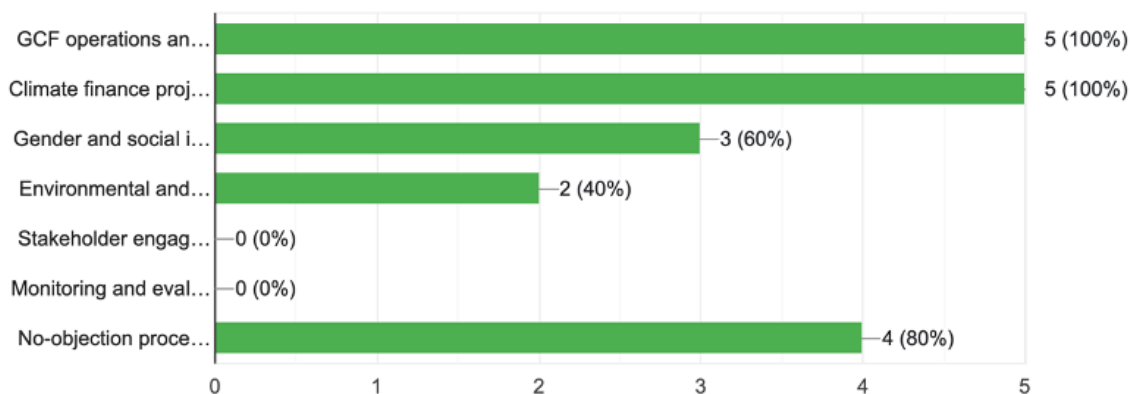

Yes	1
No	4

- Yes
- No

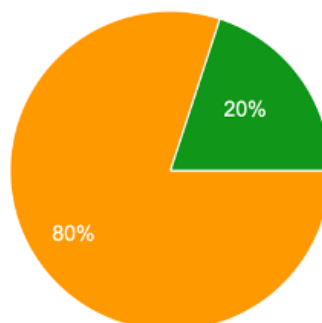

29. In which areas does the NDA staff require capacity building? (please select all that apply)

Value	Count
GCF operations and access modalities	5
Climate finance project development	5
Gender and social inclusion	3
Environmental and social safeguards	2
Stakeholder engagement	0
Monitoring and evaluation	0
No-objection procedures	4

30. How frequently does staff turnover affect institutional continuity?

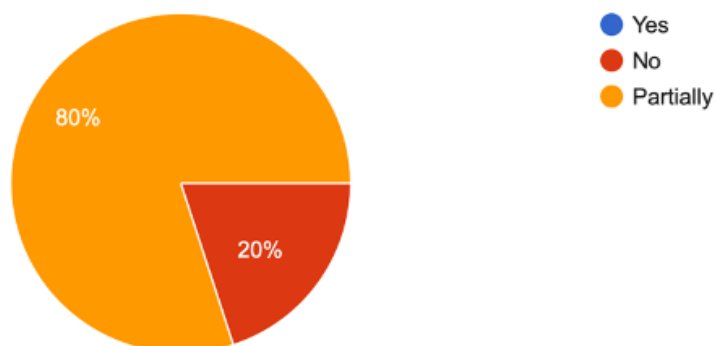

Frequently (every six months)	0
Occasionally (every year)	0
Rarely (every two years)	4
Never	1

- Frequently (every six months)
- Occasionally (every year)
- Rarely (every two years)
- Never

31. Are there mechanisms in place to retain institutional knowledge when staff leaves (e.g. manuals, knowledge tracking systems/tools, databases)?

Yes	0
No	1
Partially	4

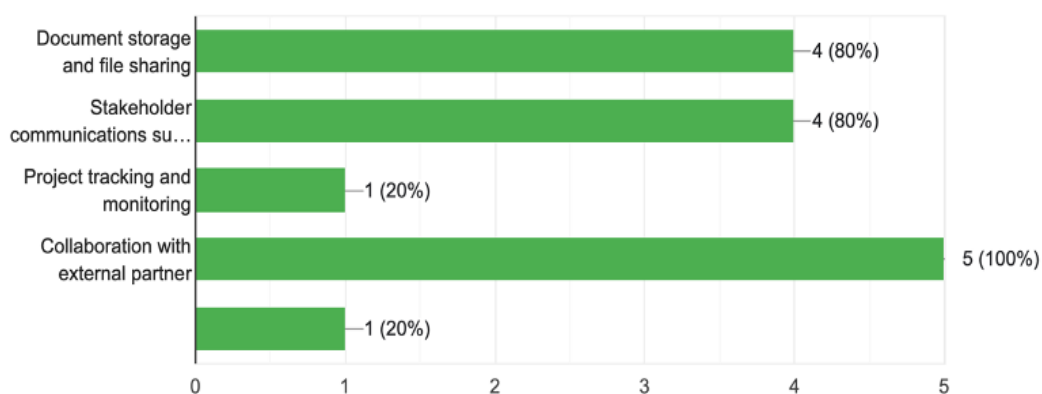

If yes or partially, please briefly describe: 3 responses

- Explicit references to formal manuals, dedicated knowledge tracking tools, or databases are not detailed, the establishment of coordination mechanisms and training workshops are efforts of an evolving system for institutional knowledge retention and transfer
- Yes, by using reports and data base
- Digitalization of working procedures

Technology and Digital Tools

32. Does the NDA use digital platforms and/or tools for the following functions? (Please select all that apply)

Value	Count
Document storage and file sharing	4
Stakeholder communications such as through mailing lists, websites, or webinars	4
Project tracking and monitoring	1
Collaboration with external partner	5

Please list any digital tools or platforms currently used: 2 responses

- The NDA does use at least the GCF digital portal for key climate finance coordination functions related to the GCF, but there is limited or no available detailed information or other digital platforms or tools used for additional functions such as knowledge tracking, grievance mechanisms, or comprehensive institutional management.
- Email and virtual meetings

Open Feedback

33. What are the NDA's top three capacity gaps or challenges in performing its GCF functions? 5 responses:

- GCF operation and access modalities project development project tracking and monitoring.
- Eritrea's NDA faces organizational and operational capacity gaps, needing a clearer coordination procedure to effectively manage GCF funds.
- There are coordination challenges among ministries and stakeholders emerging from unavailable unified national climate change strategy.
- Technical and human capacity for project identification, formulation, and stakeholder engagement needs strengthening to develop high-quality, bankable climate projects aligned with GCF criteria.
- Capacity to develop GCF compatible projects and tools used - CGF Guidelines and Procedures - Scope of GCF projects
- Capacity to develop GCF compatible projects, GCF Guidelines and procedures Scope of GCF Projects
- Organization, Communication and know-how on GCF functions.

34. What are the top three forms of support that would be most helpful to the NDA to build capacity? 5 responses:

- Human capacity building institutional capacity building and financial support
- This includes establishing a permanent NDA secretariat, improving coordination mechanisms, and enhancing procedures to plan, access, manage, deploy, and monitor climate finance effectively.
- Training NDA members and relevant ministry staff on climate finance fundamentals, GCF procedures, and developing high-quality, bankable concept notes aligned with national priorities is critical.
